GreenAer

Why eCargo & eBike Fleets?

The benefits are overwhelmingly clear. We just need more leaders.

60%

Faster

Truly Inclusive.

eBike fleets mean groups of any age or ability can explore our breathtaking countryside, and see a lot more of it. Go faster and further, covering much more ground in much less time – all while reducing your carbon footprint.

90%

Cheaper

Truly Efficient.

With zero emissions and no need for fuel, parking fees or fines, your business saves on every delivery. The low-cost 21st century solution that will improve air quality, your brand image, and gross margins. Leasing is also available.

90%

Cleaner

Truly Sustainable.

Electric mobility is healthier for drivers and healthier for the environment. As our climate hits catastrophic limits, we have no other choice but to act. Join us in transitioning the world to electric, so we still have a world to live in.

Make light work of heavy traffic.

Parking problem solved. Pollution problem solved...

Still debating making the shift from motorised vehicles to eCargo for your business? We like to think of it as less = more.

- Shorter routes and quicker at rush hour = more drops
- No longer need to circle for a spot to park = more time
- Don't require a driver's license = more staffing options
- Riders are healthier and happier = more productive team
- Better for the environment than a van/car = more future
- Shows your business values our planet = more customers

Any more questions?

UPS trialed a cargo bike hub in Dublin, replacing 4 delivery vans with 2 eTrikes. They removed 500 van-delivered packages from their supply chain, cutting company emissions by 40%.

Don't just take our word for it.

eCargo is making headlines for good reason.

Hermes trials e-cargo bikes from Citkar

Climate change puts cargo bikes in the spotlight

The UN Climate Change Conference in Glasgow earlier this month will give an unexpected push to cargo bikes. After lobbying by cycling NGOs and researchers, the COP26 organisers have agreed to include a 'climate friendly' badge for businesses that use cargo bikes to deliver goods.

Cargo Bike Pilot Scheme Aims To Get Businesses On Their Bikes

General News | Press Releases | Thursday, May 13, 2021 | DUBLIN COUNTY

Dún Laoghaire Rathdown County Council, Smart Sandyford, and bike sharing operator Bleeper today launched a pilot project which will enable businesses based in the county to trial eCargo bikes for the delivery of their products or services to clients.

It's Time for Cities to Ditch Delivery Trucks—for Cargo Bikes

A new study shows that cycling packages the final few miles to their recipients isn't just greener than using a van, but often quicker too.

UPS has plans to use e-cargo bikes in Glasgow

Two more major courier companies are trialling e-cargo bikes for last mile deliveries. FedEx Express is to introduce a fleet of eight e-cargo bikes in London, while Hermes is testing two Loadster four-wheelers from Berlin manufacturer Citkar in Germany.

FedEx's Reduce, Replace, Revolutionize strategy focuses on exploring alternative fuels and technologies among other things.

Nationwide Delivery: Radkutsche Musketier

Turning An Post green

Supply and service of the largest eCargo fleet in Europe, for the first postal service provider in the world to attain zero carbon emission delivery status in a capital city.

An Post commissioned GreenAer to supply and service a fleet of 150 heavy eTricycles, creating a seismic shift in their business model, and enabling them to make huge efficiency gains. We are proud to have given An Post the confidence to pioneer the eCargo bike revolution in Ireland, and radically change how their business operates. All of their deliveries within Dublin are now carried out 100% emission-free.

Our dedicated team of specialist mechanics provide after sales service of the eBikes, to keep their fleet rolling strong.

Small to Medium Enterprises: **Urban Arrow Cargo L**

What's not to lov?

Working with GreenAer, LOV Kombucha now leads Barcelona's last-mile eCargo revolution.

Barcelona has the highest car density of all EU cities with up to 500K motorised vehicles circulating daily. The result? Poor air quality, congestion, CO2 emissions, road accidents, and a LOT of noise. Citizens have had enough.

The solution is simple. Today, more conscious leaders are choosing eBikes for their distribution and delivery.

GreenAer

Smart Cities: Riese & Müller + Carla Cargo

Moving cities to net 0

GreenAer advised, supplied and continues to service Streetdock, a smart network of cargo storage points and zero emission delivery bikes in Belfast.

"Streetdock received public funding to accelerate the use of zero emission vehicles for urban logistics with an approach based on infrastructure. We needed to be able to offer the same services as vans and trucks, including only-mile (moving cargo around the city), last-mile (the final leg of the cargo journey to the customer) and first-mile (moving cargo from the city for collection and onward transport).

Our solution was found in a narrow and nimble combination of 2-wheeled or longtail eCargo bikes with eTrailers, to increase our cargo capacity. We can now move around the city using cycle lanes, and avoid traffic when there's no cycle lane provision."

Meals on wheels

The Crêpe Escape is a total conversation starter. Demonstrating their values, they bring in more sales.

Gaël needed a rig that was big enough to carry two crêpe-makers, ingredients, utensils and a gazebo. "The trailer is ideal for me and its appeal is undeniable. We can have the same business, being innovative and adaptable, in a more fun, ecological and affordable way. I'm proud to not rely on fossil fuel or engines for The Crêpe Escape, in addition to using only local, organic and compostable supplies."

Fleets for Active Tourism: Riese & Müller Nevo

SideTracked helps our climate get on track

Exhilarating adventures and miles of smiles.

GreenAer worked side-by-side with SideTracked Kenmare to identify and supply the perfect eBike for their guided and self-guided tours.

Off the beaten path and far away from the usual tourist traps, SideTracked's low-footprint, low-traffic day-trips take in some of the Wild Atlantic Way's most dramatic scenery, while giving the car a much-needed day off.

Bloom eRiders take Haibike to new heights

Exhilarating adventures and miles of smiles.

GreenAer assisted the Bloom eRiders launch of Ireland's first fleet of full suspension eMTBs, to meet a growing demand for sustainable tourism, and to enable riders of all ages and abilities to experience the beauty and challenges that the Slieve Bloom trails have to offer.

Haibike was chosen for its unquestionable reputation, solid German engineering and design, and range of models to suit all tastes — from highly aggressive riding to mellow or casual off-road enjoyment.

GreenAer

Corporate & Government Fleets: Orbea Optima

This is leadership

GreenAer helped Dún Laoghaire-Rathdown County Council select the best eBike fleet for their staff.

GreenAer proudly assisted the county council in leasing 20 Orbea eBikes for their employees, meeting their requirements and goals to reduce car and taxi journeys within the council area. All bikes were branded with their name and logo.

They're walking their talk. Lowering emissions, and using their visibility and press exposure to lead by example. Other county councils have since followed suit.

GreenAer

"We knew enough to know we didn't know enough about eCargo bikes! So we reached out to GreenAer to pick their brains on what our best options were.

From the outset, the team at GreenAer were fantastic and we were very impressed with their level of experience and depth of knowledge, not just on the actual bikes and equipment but also from the work they had done over previous years with a range of other customers, including commercial ones. We were confident we were talking to the right people to help us choose the right bikes and everything else we would need to get our green delivery pilot up and running.

The ongoing support since then has been brilliant, they are always ready to help and flexible and patient with our needs and requests. I couldn't recommend the GreenAer team enough."

Ian Richardson
CEO, Streetdock

GreenAer

Last-mile delivery, Planet-first mentality

Purpose-built, high-impact, low-cost transport.
A market with expected growth of 15x by 2026.
Welcome to the future of urban mobility.

"A smart city has to be safe and livable. The air you breathe has to be pleasant, not endangered by vehicles and pollution. You can either add to the congestion, or be part of the solution. It's your choice. We're here to help."
